

CODE EXERCISE

JAVASCRIPT OUTPUT

Create a new .html file with script tags as demonstrated in the video. Create a JavaScript application that outputs your name and where you live three different ways:

- 1) First, output the information to the web document using the `document.write()` command.
- 2) Next, output your name and where you live to the console using `console.log()`.
- 3) Finally, create a logical division in your HTML body using the following code:

```
<div id="output"></div>
```

Output your name and where live so it appears in the logical division you just created.

SUBMITTING EXERCISES

To earn certification all exercises must be submitted and accepted.

1) When you've completed all of the HTML exercises, please zip them into a single file and submit to our Dropbox at <http://bit.ly/CWDP2324>.

2) Next, fill out the certification completion form at <https://forms.gle/5EiUGCM6dGdIF2Py6>.

Remember, that all of your exercises for each module should be included in a separate zip file.

GETTING HELP

We always want to ensure that your questions are answered. There are a number of ways to get in touch.

1) We operate a lively Discord server. Join us at <https://discord.gg/tgxX2fCrv5> and you can ask your question on Discord. Mark and our team of instructional assistants monitor this Discord and answer questions ASAP.

2) This certification program is offered on several platforms. Most platforms have a Q & A section where you can post questions. We monitor these and respond as quickly as we can.

3) You may use our question hotline email at questions@dollardesignschool.com.

Remember to always to include which section your question is from and send any code you're working on!
